

Directions for use

BLOOD Blood

Grimas Blood has a light and syrupy texture and a deep red colour. It is used for finishing 'wounds' and can be applied directly onto the skin.

Procedure

You can apply it directly from the tube or with a brush. Use a Grimas Stoppel Sponge or a tissue to disperse the blood around the 'wound', if desired.

Removal

The blood can be removed from the skin with cold water initially and then with water and soap.

If Blood, Filmblood or Blood Paste got onto clothing, rinse it out under a tap. Leave the item of clothing to soak in water containing a pre-wash (Biotex). Then wash it by hand or put it in the washing machine.

Safety information

BLOOD Blood

8 ml

Packaging:	Colour: transparent (tube) Content: 8 ml
Appearance:	Thick red liquid.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (8 ml). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Can be used for children.
Around the eyes:	May be used near the eyes. Not in the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water.
Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

BLOOD

Blood

INCI	<%
Aqua, Hydrogenated starch hydrolysate	95
Hydroxyethylcellulose	2
Peg-7 glyceryl cocoate	2
Methylparaben	0.2
2-Bromo-2-nitropropane-1,3-diol	0.03
CI 16255	4

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

BLOOD

Blood

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist
for dermatology and allergology

Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
