

Directions for use

COLOUR POWDER

Colour powder

Grimas Colour Powder is a loose, slightly tinted, water-repellent powder in a range of colours. Colour Powder can be applied directly to the skin or on top of Grimas Foundation, Crème Make-up Pure or Camouflage Make-up Pure to give the skin a smooth, matt or waterproof finish.

Colour Powder is available in a range of matt skin shades (waterproof).

Procedure

Colour Powder can be applied with a Grimas Velour Powder Puff, a Powder Puff or a Powder Rouge Brush.

Gently tap the puff or brush on the back of the hand and then apply lightly on top of the make-up. Allow to settle in and remove excess powder with a Powder-Rouge Brush.

The make-up result is transparent and also suitable for a dark skin.

Safety information

COLOUR POWDER

Colour powder

10 ml

60 g

Packaging:	Colour: black + transparent Content: 10 ml, 60 g
Appearance:	Coloured loose powder.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (60 g). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.

Composition

COLOUR POWDER Colour powder

INCI	<%
Talc, Zinc stearate	100
Phenoxyethanol	0.45
Methylparaben	0.05
CI 77491, CI 77492, CI 77499	10
CI 77007	10
CI 15850	1

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

COLOUR POWDER Colour powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.
