

Directions for use

COMPACT POWDER

Compact Powder

Grimas Compact Powder is a compressed matt powder that can be used as basic make-up or for powdering off. Compact Powder can be applied directly to the skin or on top of Grimas Cake Make-up, Foundation, Camouflage Make-up Pure and Crème Make-up Pure to give the skin an even or matt finish, or to affect the colour further.

Procedure

Take the Compact Powder out with a velour powder puff. Test the colour intensity on the hand. You apply the Compact Powder evenly from top to bottom. Work the base out properly, up into the hairline, and do not forget the ears and neck. This is how you avoid a mask-like effect.

Removal

You can remove the Compact Powder with Grimas Cleansing Milk. Cleanse the skin afterwards with Grimas Cleansing Lotion.

Make-up should preferably be stored in dry, dark and cool conditions.

Safety information

COMPACT POWDER

Compact Powder

8 g

Packaging:	Colour: Black Content: 8 g
Appearance:	Pressed powder in skin tones and various colours.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (8 g). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Can be used for children.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.

CI 77491, CI 77492, CI 77499, CI 77891	20

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

COMPACT POWDER Compact Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.
