

Directions for use

CRÈME MAKE-UP PURE Crème Make-up Pure

Grimas Crème Make-up Pure is a make-up that has good covering capabilities and is based on oils and waxes. Crème Make-up Pure is used for visagie and theatrical make-up. The waxes and oils allow Crème Make-up Pure to be blended away easily, making it excellent for highlights and shadows, both for visagie (shaping, modelling) and theatrical purposes (ageing, creating various characters, effects). Crème Make-up Pure can also be used as cream eye shadow or blusher. The colours can be mixed together.

Only bright colours of Crème Make-up Pure are suitable for colouring Grimas Latex Noses and Sets.

Pure means that the product in question does not contain any chemical preservatives (such as parabens) or halogenated organic compounds. The 'pure' products, like all Grimas products, are also gluten-free and unperfumed.

Procedure

As a result of its composition of waxes and oils, Crème Make-up Pure is tolerated well by dry and sensitive skin. First degrease and clean the skin you are going to be working on with Grimas Cleansing Lotion. Then wipe dry with a tissue. On greasy or combination skin (partially greasy) you can apply a very thin layer of Grimas Anti Shine to the T-zone (forehead, nose and chin) before you apply the Crème Make-up Pure.

Take the Crème Make-up Pure out with a clean spatula and work from the spatula. Rubbing it with your fingertip will make it softer and easier to handle. Apply it with a slightly damp latex sponge or make-up sponge onto the skin. Work the base out properly, up into the hairline, and do not forget the ears and neck. This is how you avoid a mask-like effect.

To fix and mattify, you can powder the Crème Make-up Pure off with Grimas Fixing Powder or Make-up Powder. If you want to affect the colour more, you can use Grimas Compact Powder or Colour Powder.

Removal

You can remove Crème Make-up Pure with Grimas Cleansing Cream, Multi Remover or Make-up Remover. Cleanse the skin afterwards with Grimas Cleansing Lotion.

Safety information

CRÈME MAKE-UP PURE Crème Make-up Pure

2.5 ml

15 ml

60 ml

4 x 2,5 ml

6 x 2,5 ml

12 x 2.5 ml

Packaging:	Colour: Transparent Content: 2.5 ml, 15 ml, 60 ml Palettes: 4 x 2,5 ml, 6 x 2,5 ml, 12 x 2.5 ml
Appearance:	Waxy product in skin tones and various colours.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (60 ml). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Suitable for use on children. Has the Danish A-category certificate.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water.
Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place. Dry with a tissue after use.

Composition

CRÈME MAKE-UP PURE Crème Make-up Pure

INCI	<%
Cera alba, Cera microcristallina, Copernicia cerifera cera, Paraffin	65
Octyldodecanol, Paraffinum liquidum	60
Kaolin	25
Ascorbyl palmitate, Citric acid, Lecithin, Tocopherol	1
Glyceryl oleate, Glyceryl stearate	0.1
CI 77491, CI 77492, CI 77499, CI 77891	50
CI 77007	10

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

CRÈME MAKE-UP PURE Crème Make-up Pure

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist
for dermatology and allergology

Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
