

## Directions for use

### FILMBLOOD

#### Filmblood

Grimas Filmblood is blood that retains its shine and does not dry out. It is used for finishing 'wounds' and can be applied directly onto the skin.

#### Procedure

You can apply it directly from the bottle. The 25 ml and 100 ml bottle have a special spout top for easy application.

#### Removal

Filmblood is to be removed from the skin first with just cold water and then with water and soap.

If Blood, Filmblood or Blood Paste got onto clothing, rinse it out under a tap. Leave the item of clothing to soak in water containing a pre-wash (Biotex). Then wash it by hand or put it in the washing machine.

## Safety information

### FILMBLOOD

#### Filmblood

25 ml

100 ml

500 ml

1000 ml

<b>Packaging:</b>	Colour: black + transparent Content: 25 ml, 100 ml (bottle with spout top) Content: 500 ml, 1000 ml (flask with child-proof top)
<b>Appearance:</b>	Red liquid.
<b>Ingredients:</b>	See label and composition.

<b>Improper use:</b>	Assessed according to the standard of consuming regularly 1000 ml for adults and 100 ml for children. No toxicological effect.
<b>Bacteriology:</b>	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically.
<b>Dermatology:</b>	See dermatological declaration.
<b>Use on children:</b>	Suitable for use on children. Has the Danish A-category certificate.
<b>Around the eyes:</b>	May be used near the eyes. Not in the eyes.
<b>On the mucous membranes:</b>	May be used on the mucous membranes.
<b>Make-up in the eyes:</b>	Rinse with water.
<b>Durability:</b>	See label with symbols:  = period-after-opening  = date of minimum durability
<b>Storage:</b>	Store in a dry, dark place.

## Composition

### FILMBLOOD

#### Filmblood

INCI	<%
Aqua, Hydrogenated starch hydrolysate	98
Hydroxyethylcellulose	2
Peg-7 glyceryl cocoate	2
Methylparaben	0.2
2-Bromo-2-nitropropane-1,3-diol	0.03
CI 14700, CI 16255, CI 42090	4

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## Dermatological declaration

### FILMBLOOD

#### Filmblood

In the dermatological declaration one can read the following:  
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist  
for dermatology and allergology

## Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
