

Directions for use

FIXING POWDER

Fixing Powder

Grimas Fixing Powder is a loose, transparent, water-repellent powder for various make-up (camouflage make-up in particular). It is used for fixing Grimas Foundation, Crème Make-up Pure, Camouflage Make-up Pure and Lipstick ('kiss-proof').

Fixing Powder is transparent and does not influence the colour.

For powdering off darker skin, we recommend using Grimas Colour Powder.

Procedure

Fixing Powder can be applied with a Grimas Velour Powder Puff, a Powder Puff or a Powder Rouge Brush. Gently tap the puff or brush on the back of the hand and then apply lightly on top of the make-up. Allow to settle in and remove excess powder with a Powder-Rouge Brush.

FIXING POWDER

Fixing Powder

2.5 ml

10 ml

60 g

180 g

4 x 2,5 ml

6 x 2,5 ml

12 x 2.5 ml

Packaging:

Colour: black + transparent
Content: 2.5 ml (pressed powder)
Content: 10 ml, 60 g, 180 g (loose powder)
Palettes: 4 x 2,5 ml, 6 x 2,5 ml, 12 x 2.5 ml

Appearance:

Loose or pressed powder in off-white.

Ingredients:

See label and composition.

Toxicology:

Assessed against the Cosmetics Regulation (1223/2009/EC).

Improper use:

Assessed according to the standard of consuming regularly the content of the largest package size (180 g).
No toxicological effect.

Bacteriology:

Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present.
Work hygienically: with clean hands and clean materials.

Dermatology:

See dermatological declaration.

Use on children:

Can be used for children.

Around the eyes:

May be used near the eyes.

On the mucous membranes:

May be used on the mucous membranes.

Make-up in the eyes:

Rinse with water.

Durability:

See label with symbols:

 = period-after-opening

 = date of minimum durability

Storage:

Store in a dry, dark place.

Composition

FIXING POWDER Fixing Powder

INCI	<%
Talc	90
Zinc stearate	25
Octyldodecanol	5
Phenoxyethanol	0.45
Methylparaben	0.05
CI 77491, CI 77492, CI 77499	10

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

FIXING POWDER Fixing Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß
