

Directions for use

MAKE-UP POWDER

Make-up Powder

Grimas Make-up Powder is a loose, dry, very matt powder for various make-up purposes (beauty in particular). It is used for fixing Grimas Foundation, Crème Make-up Pure or Camouflage Make-up Pure.

Its strong matt finishing properties also make Make-up Powder highly suitable for greasy skin and for use in photography.

Make-up Powder is light in colour but becomes transparent when it comes into contact with the make-up. The powder is also very suitable for the dark skin.

Procedure

Make-up Powder can be applied with a Grimas Velour Powder Puff, a Powder Puff or a Powder Rouge Brush.

Gently tap the puff or brush on the back of the hand and then apply lightly on top of the make-up. Allow to settle in and remove excess powder with a Powder-Rouge Brush.

Safety information

MAKE-UP POWDER

Make-up Powder

10 ml

50 g

150 g

Packaging:	Colour: black + transparent Content: 10 ml, 50 g, 150 g
Appearance:	Yellowish loose powder.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).

Composition

MAKE-UP POWDER Make-up Powder

INCI	<%
Talc, Kaolin	95
Phenoxyethanol	0.45
Methylparaben	0.05
CI 77491, CI 77492, CI 77499	5

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

MAKE-UP POWDER Make-up Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.
