

## Directions for use

### MULTI REMOVER PURE Multi Remover Pure

Grimas Multi Remover Pure is a two-phase liquid on a oil basis. Multi Remover Pure gets rid of all types of make-up, including heavy and extreme make-up such as Grimas Crème Make-up Bright (Pure), Crème Make-up Pure, Camouflage Make-up Pure, Derma Wax, Nose Wax and Eyebrow Plastic. It can also be used to remove any traces of colour that are left behind on the skin after a make-up is removed.

Pure means that the product in question does not contain any chemical preservatives (such as parabens) or halogenated organic compounds. The 'pure' products, like all Grimas products, are also gluten-free and unperfumed.

#### Procedure

Shake well before use.

Apply Multi Remover Pure to a cotton wool pad and dab onto the skin. Massage in briefly and remove with a tissue or a dry piece of cotton wool. If a slight film forms on the skin, cleanse it afterwards with Grimas Cleansing Lotion.

## Safety information

### MULTI REMOVER PURE Multi Remover Pure

25 ml

100 ml

<b>Packaging:</b>	Colour: transparent (bottle) Content: 25 ml (bottle with spout top) Content: 100 ml (bottle with spout top)
<b>Appearance:</b>	Two-phase liquid
<b>Ingredients:</b>	See label and composition.
<b>Toxicology:</b>	Assessed against the Cosmetics Regulation (1223/2009/EC).

<b>Durability:</b>	See label with symbols:  = period-after-opening  = date of minimum durability
<b>Storage:</b>	Store in a dry, dark place.

## Composition

### MULTI REMOVER PURE Multi Remover Pure

INCI	<%
Isopropyl myristate	95
Peg-40 hydrogenated castor oil	15

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## Dermatological declaration

### MULTI REMOVER PURE Multi Remover Pure

In the dermatological declaration one can read the following:  
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist  
for dermatology and allergology

## Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
