

Directions for use

TOOTH ENAMEL

Tooth Enamel

Grimas Tooth Enamel is an alcohol-based varnish that can be used to colour teeth.

Procedure

Dry the teeth with a tissue. Shake the bottle well before use. Apply Tooth Enamel with the brush and allow to dry for a few seconds. Do not use Tooth Enamel on dentures and teeth with fillings. A porous surface will make Tooth Enamel difficult to remove.

Removal

You can remove the tooth enamel with a tissue soaked in an alcoholic liquid. Colour residues on or between the teeth can easily be removed with a toothbrush and toothpaste.

Safety information

TOOTH ENAMEL

Tooth Enamel

10 ml

Packaging:	Colour: transparent (cap with brush) Content: 10 ml
Appearance:	Liquid in various colours.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC). Contains Isopropyl alcohol, known to be toxic and harmful to the unborn baby.

Storage:	Close packaging properly. Store in a dry, dark place. Isopropyl alcohol is a fire hazard. Do not use near open flame.

Composition

TOOTH ENAMEL

Tooth Enamel

INCI	<%
Isopropyl alcohol	75
Mica	25
Glyceryl hydrogenated rosinat, Colophonium	25
Silica (nano)	5
CI 77491, CI 77492, CI 77499, CI 77891	25
CI 16255	20
CI 77266	5

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

TOOTH ENAMEL

Tooth Enamel

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
