

Directions for use

TRANSPARENT POWDER

Transparent Powder

Grimas Transparent Powder is a loose powder. Transparent Powder is used by make-up artists to fix and give a matt finish to Grimas Crème Make-up Pure and Derma Wax. Transparent Powder has a white colour of its own and becomes transparent on contact with waxes and oils (as are used in Grimas Crème Make-up Pure for example).

Transparent Powder is not suitable for the dark skin (turns greyish). Use for the dark skin Grimas Make-up Powder or Colour Powder.

Procedure

Transparent Powder can be applied with a Grimas Velour Powder Puff, a Powder Puff or a Powder Rouge Brush. Gently tap the puff or brush on the back of the hand and then apply lightly on top of the make-up. Allow to settle in and remove excess powder with a Powder-Rouge Brush.

Safety information

TRANSPARENT POWDER

Transparent Powder

10 ml

40 g

120 g

Packaging:	Colour: black + transparent Content: 10 ml, 40 g, 120 g
Appearance:	White loose powder.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly 60 g No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Suitable for use on children. Has the Danish A-category certificate.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water.
Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

TRANSPARENT POWDER Transparent Powder

INCI	<%
Talc	80
Calcium carbonate, Magnesium carbonate hydroxide, Zinc stearate	30
Phenoxyethanol	0.45
Methylparaben	0.05

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

TRANSPARENT POWDER Transparent Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.
