### **Directions for use**

### SPECIAL EFFECTS / BLISTER GEL Special Effects / Blister Gel

Grimas Special Effects / Blister Gel is a firm paste with a light adhesive power. It is used to simulate blisters and wound fluid. In addition, Special Effects / Blister Gel can be coloured by mixing it with Grimas Special Effects Powder.

#### **Procedure**

Special Effects / Blister Gel can be applied directly onto the skin. You can touch up the edges of the applied Special Effects / Blister Gel or let it flow with the help of a slightly damp make-up sponge.

#### Removal

Rinse the Special Effects / Blister Gel off the skin with lukewarm water. If needed you can further clean the skin with lukewarm water and soap (or shampoo). Do not use ready-to-use cleansing cloths.

## **Composition**

### SPECIAL EFFECTS / BLISTER GEL Special Effects / Blister Gel

INCI	<%
Aqua, Hydrogenated starch hydrolysate	95
Carbomer, Magnesium aluminum silicate	8
Aminomethyl propanol	1
Methylparaben	0.2
2-Bromo-2-nitropropane-1,3-diol	0.03

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## **Dermatological declaration**

### SPECIAL EFFECTS / BLISTER GEL Special Effects / Blister Gel

In the dermatological declaration one can read the following: The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.
