Directions for use

CRYSTAL FLAKES
Crystal Flakes

Grimas Crystal Flakes are high-gloss, plastic-free glitters with a flat structure. They are used for special effects in visagie and for various make-up purposes.

Crystal Flakes are made from synthetic mica and are therefore completely plastic-free. Thanks to the flat structure the Crystal Flakes feel soft on the skin. Moreover, Crystal Flakes are safe for use near the eyes.

Crystal Flakes dissolve when they come into contact with water.

Procedure
Apply a thin layer of Grimas Fix Gel, Body Glue or Primer Pro to the skin. Spread the Crystal Flakes over the applied base layer using a brush, a make-up sponge or with your fingers. The more Crystal Flakes are applied to the same place, the more the Crystal Flakes will cluster. Lightly press the Crystal Flakes to ensure that they adhere well to the surface.

Apply the Crystal Flakes to a colour of Grimas Lipstick, or mix the Crystal Flakes with Grimas Gloss 00 for a brilliant lip gloss.

Removal
Crystal Flakes can be removed with lukewarm water and soap (you can also use shampoo). Use Grimas Multi Remover Pure if Body Glue or Primer Pro has been used as a base layer. Massage it in briefly and rinse off with lukewarm water.
Do not use ready-to-use cleansing cloths.

Safety information

CRYSTAL FLAKES
Crystal Flakes

8 g

Packaging:	Colour: transparent (bottle) Content: 8 g
Appearance:	Loose glitterflakes.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (8 g). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Can be used for children.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water.
Durability:	See label with symbols: 12M = period-after-opening = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

CRYSTAL FLAKES
Crystal Flakes

INCI	<%
Synthetic fluorphlogopite	100
Tin oxide	5
CI 16035	25
CI 42090	25
CI 77891	25
CI 45410	10
CI 15850	5
CI 19140	5

The ingredients that are present in the product in the greatest proportions are listed first.
Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

CRYSTAL FLAKES
Crystal Flakes

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß
