

Directions for use

FIX GEL Fix Gel

Grimas Fix Gel is a skin adhesive that dries transparently. It is used to apply Grimas Sparkling Powder, Pearlite (Metallic), Crystal Flakes and Shimmer Flakes to the skin.

Fix Gel contains no alcohol and is therefore ideal for use on children.

The packaging has a cap with a brush, with which the skin glue can easily be applied to the desired place.

Procedure

Apply a thin layer of Fix Gel to the skin and spread the glitters over it. Lightly press the glitters to allow them to adhere well to the Fix Gel.

Removal

Fix Gel can be removed with lukewarm water and soap (you can also use shampoo). Massage it in briefly and rinse off with lukewarm water. Do not use ready-to-use cleansing cloths.

Safety information

FIX GEL Fix Gel

10 ml

Packaging:	Colour: transparent (cap with brush) Content: 10 ml
Appearance:	Syrupy white liquid.
Ingredients:	See label and composition.

Composition

FIX GEL Fix Gel

INCI	<%
Aqua	90
Acrylates/ethylhexyl acrylate copolymer	25
Hydroxyethylcellulose	5
Caprylyl glycol	1
Peg-40 hydrogenated castor oil	1
Sodium dehydroacetate	1
Phenoxyethanol	0.45

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

FIX GEL Fix Gel

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.
