

Directions for use

SPECIAL EFFECTS POWDER

Special Effects Powder

Grimas Special Effects Powder is a coloured fine powder that is used to create various special effects in a simple way. It can be applied on the skin, in the hair and onto clothing. Special Effects Powder is available in 6 different colours. In addition, the colours can be mixed with each other for even more colour nuances.

Thanks to the diverse application possibilities and the realistic effects that can be achieved with it, Special Effects Powder is suitable for many purposes: from Halloween and film / theater to accident simulation.

Procedure

Turn the package upside down and tap the bottom of the bottle to dispense the Special Effects Powder. Apply the powder with a brush, a make-up sponge or with your fingers. Special Effects Powder can be used in dry and liquid form (mixed with water or Grimas Cleansing Lotion). Moreover, it is very suitable for colouring Grimas Special Effects / Blister Gel and thus creating a solid coloured gel.

If you want to use Special Effects Powder in liquid form, dip the brush in water or Grimas Cleansing Lotion first and then in the Special Effects Powder.

Removal

Special Effects Powder can be removed with lukewarm water and soap (you can also use shampoo).

Safety information

SPECIAL EFFECTS POWDER

Special Effects Powder

6 g

Packaging:	Colour: transparent (bottle) Content: 6 g
Appearance:	Coloured loose powder.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (6 g). No toxicological effect.

Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

SPECIAL EFFECTS POWDER Special Effects Powder

INCI	<%
Talc	75
Magnesium carbonate hydroxide	25
Butylene glycol cocoate	5
Sucrose stearate	5
Polymethyl methacrylate	1
CI 77499	50
CI 16255	25
CI 77266	25
CI 77492	25
CI 77891	25
CI 15850	10
CI 77491	5
CI 74160	1

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

SPECIAL EFFECTS POWDER Special Effects Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.
