

Directions for use

SCAR WAX Scar Wax

Scar Wax is a wax that can easily be moulded, used for make-up effects such as creating various wounds and deformities on the skin. It's easy to apply and remove, so it can be used on and by young and old.

Procedure

Take the required amount of Scar Wax out of the packaging with a (Derma Wax) spatula. Then make the wax workable by kneading it briefly between the fingers. If desired, you can colour the Scar Wax at this point with, for example, a little Crème Make-up or Special Effects Powder - you simply knead this through.

Apply the Scar Wax to the skin and smooth the edges down so that grease and moisture cannot get underneath. Smooth the Scar Wax surface and edges off with the fingertip and possibly a little bit of Cleansing Cream.

Optional (for the best result):

Dab all over with a dry, clean make-up sponge. Doing this, you remove the excess Cleansing Cream and you create a skin-texture effect. Powder the whole with a make-up sponge with Transparent Powder to matt and fix it; then turn the sponge over and continue dabbing with the clean side until the excess powder has been removed.

Removal

Scrape the Scar Wax off the skin with the spatula.
Massage Grimas Multi Remover Pure or Cleansing Cream into the skin.
Repeat the above 2 steps as many times as necessary.
If a slight film forms on the skin, cleanse it afterwards with Cleansing Lotion.

Safety information

SCAR WAX Scar Wax

25 ml

Packaging:	Colour: grey Content: 25 ml
Appearance:	Transparent wax in light skin tone.
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (25 ml). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Suitable for use on children.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water. Consult a physician if necessary.
Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

SCAR WAX Scar Wax

INCI	<%
Paraffin	50
Cera alba	25
Cera microcristallina	25
Glyceryl hydrogenated rosinat	25
Petrolatum	25
CI 77891	1
CI 16255	0.1

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

SCAR WAX Scar Wax

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSIONS

Under the conditions of this test we found no evidence of primary irritation or allergic hypersensitivity.

None of the thirty patch-tests resulted in positive reactions after 24, 48 and 72 hours.

The investigating specialist for dermatology and allergology considers this test-product safe for use.

Dr.med.Werner Voß

Investigating specialist
