

Directions for use

SPARKLING POWDER Sparkling Powder

Grimas Sparkling Powder is a fine, highly pigmented powder with a subtle shimmer. It's plastic-free and a great alternative to plastic glitters. You can create fantastic beauty make-ups with it, but Sparkling Powder is also used for making glitter tattoos. It's available in many different colours, which can also be mixed with each other.

Procedure

Sparkling Powder can be applied in dry form as well as on an adhesive surface.

Apply Sparkling Powder to a thin layer of Grimas Body Glue (for a waterproof and long-lasting result), Fix Gel or Stoppelpasta.

Mix Sparkling Powder with Grimas Primer Pro for an intense long lasting waterproof make-up.

By mixing Sparkling Powder with Grimas Gloss 00 or Lipstick Base (Pearl), you can easily create a new shimmering colour of Gloss or Lipstick.

Removal

Remove Sparkling Powder with lukewarm water and soap (you can also use shampoo). Massage it in briefly and rinse off with lukewarm water. Do not use ready-to-use cleansing cloths.

Because Sparkling Powder consists largely of pure colour pigments, it can occur with a number of colours (730, 731, 740 and 760) that a slight trace of colour remains when mixed with water or Grimas Cleansing Lotion and used directly on the skin.

Safety information

SPARKLING POWDER Sparkling Powder

5 ml

Packaging:	Colour: transparent + black (5 ml) Content: 5 ml
Appearance:	Coloured sparkling powder
Ingredients:	See label and composition.
Toxicology:	Assessed against the Cosmetics Regulation (1223/2009/EC).
Improper use:	Assessed according to the standard of consuming regularly the content of the largest package size (5 ml). No toxicological effect.
Bacteriology:	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands and clean materials.
Dermatology:	See dermatological declaration.
Use on children:	Can be used for children.
Around the eyes:	May be used near the eyes.
On the mucous membranes:	May be used on the mucous membranes.
Make-up in the eyes:	Rinse with water.
Durability:	See label with symbols:  = period-after-opening  = date of minimum durability
Storage:	Store in a dry, dark place.

Composition

SPARKLING POWDER Sparkling Powder

INCI	<%
Calcium sodium borosilicate	75
Mica	75

Silica	25
Tin oxide	1
CI 77000	100
CI 77491	75
CI 77499	75
CI 77891	75
CI 15850	25
CI 19140	25
CI 42090	25
CI 45410	25
CI 77268:1	25
CI 77510	10
CI 77492	5

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

Dermatological declaration

SPARKLING POWDER Sparkling Powder

In the dermatological declaration one can read the following:
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.
