

## Directions for use

### PRIMER PRO

Primer Pro

Grimas Primer Pro is a waterproof mixing medium - a multifunctional, transparent liquid. The effective, ingenious Primer Pro acts as an invisible barrier between skin and makeup product.

Just a drop of Primer Pro on the skin underneath your (powder) eyeshadow provides a long-lasting, non-marking look and makes the colour even more intense. Or mix it and turn your favourite colour of Eyeshadow/Rouge, Sparkling Powder or Pearlite into a beautiful waterproof makeup, eyeliner or lippgloss!

Besides that, Primer Pro can be mixed with any makeup product to transform the product into a waterproof formula.

Mixing medium  
Multifunctional  
Waterproof  
transparent liquid  
Turns any powder product into a liquid product  
Provides intense colour coverage  
Prevents dehydration  
Ideal for body art and body painting  
paraben free  
Alcohol-free

### Procedure

Apply the Primer Pro directly to the desired area with a brush.

### Removal

Remove Primer Pro with Grimas Multi Remover Pure, Cleansing Milk or Make-up Remover. Cleanse the skin afterwards with Grimas Cleansing Lotion. Do not use ready-to-use cleansing cloths.

## Safety information

### PRIMER PRO

Primer Pro

## Composition

### PRIMER PRO Primer Pro

INCI	<%
Isododecane	75
Trimethylsiloxysilicate	25
Dimethicone	25

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## Dermatological declaration

### PRIMER PRO Primer Pro

In the dermatological declaration one can read the following:  
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.

Dr. med. Gerrit Schlippe  
Investigating specialist  
for dermatology, venereology

## Safety declaration

Has been evaluated at:

The toxicity profile of the ingredients used, taking account of any contaminants present.

Interactions between the various raw materials.

Quantities of weight and volume the consumer is exposed to.

Foreseeable improper use by the consumer-group.
