

## Directions for use

### LASH ADHESIVE LATEX FREE

Lash Adhesive Latex Free

Grimas Lash Adhesive Latex Free is a latex-free eyelash glue, suitable for false eyelashes and loose eyelash pieces. The long-lasting formula is waterproof, easy to apply and dries quickly.

The packaging has a thin applicator, with which the adhesive can be accurately applied to the false eyelash (pieces).

Lash Adhesive Latex Free is available in a white shade that dries transparent and in a dark shade (101) that turns black after drying.

### Procedure

Apply the Lash Adhesive Latex Free directly to the false eyelash (pieces) with the applicator.

### Removal

Remove the false eyelash (pieces) from the skin (use a little Grimas Cleansing Milk if necessary). Then remove the Lash Adhesive Latex Free from the false eyelash (pieces) with Grimas Mastix Remover.

## Safety information

### LASH ADHESIVE LATEX FREE

Lash Adhesive Latex Free

3 ml

<b>Packaging:</b>	Colour: Transparent + black (cap with brush) Content: 3 ml

## Composition

### LASH ADHESIVE LATEX FREE Lash Adhesive Latex Free

INCI	<%
Aqua	65
Acrylates/ethylhexyl acrylate copolymer	50
Caprylyl glycol	1
Sodium dehydroacetate	1
Phenoxyethanol	0.35
CI 77499	25

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## Dermatological declaration

### LASH ADHESIVE LATEX FREE Lash Adhesive Latex Free

In the dermatological declaration one can read the following:  
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.
